

To make a 2-sided copy, follow your printer's instructions for loading the sheet of paper back into your printer and then press the PRINT button again. [For most laser printers, the first print side should be face-up with this edge toward the printer. For upright ink-jets, the print side should be face-down with this edge toward the printer.] After you make a two-sided copy, you will have 2 complete PhraseCards. Cut each one out and fold it as shown by the FOLD HERE notice. Use a plastic protector, clear tape or laminate it to keep it from smudging your clothes.

PhraseCard™ World -1 Natural Phonetics™

SIDE 2

About Natural Phonetics™. Our Natural Phonetics™ make it easy to speak a little of another language. We use English words to match the sounds. A single letter is pronounced like a single letter of the American alphabet. For example, "A" is pronounced "A" and not "Ah". Just read the phonetics as if you were reading American English. We also give pronunciation clues for made-up words such as "Rhymes with" and "as in". A dot • between 2 phonetic syllables means say the two phonetic words on either side of the dot • very fast like one word. We recommend that you review the card before using it and practice with a native speaker.

Free Technical Support. If you have a problem using please contact Technical Support. It is free except you web, please visit our website at www.travelscience.com. Or send an email to support@travelscience.com. **User Feedback.** If you believe there is a mistake on this card or you have ideas for improvements, please send an email to feedback@travelscience.com.

the Pocket Reader™ or printing this PhraseCard™, pay the normal phone charge.
